PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience building scalable backend systems and production-grade Generative AI applications. Experience in event-driven microservices, high-performance APIs, and RAG-based AI systems. Proven track record of designing system architectures using pub/sub, optimizing databases, and deploying cloud-native solutions.

WORK EXPERIENCE

INTELLIOD

Sept 2025 – Present

Software Engineer

- Built RAG-based AI pipelines using vector search
- Developed AI agents (MCP architecture) for automation
- Designed event-driven AI workflows using Kafka (pub/sub)
- Optimized embedding and retrieval pipelines for low latency
- Built secure backend APIs with RBAC and validation
- Set up CI/CD and observability (GitHub Actions, CloudWatch)

MINDCOM TECHNOLOGIES PVT LTD

July 2023 – Aug 2025

Software Engineer

- Architected event-driven microservices using Kafka (pub/sub) and SQS
- Designed APIs handling 100K+ daily requests with async processing
- Built payment backend microservices integrating Razorpay and Stripe with webhook-based event flows for order lifecycle management
- Developed AI concierge system (chatbot + recommendation engine)
- Optimized PostgreSQL/MongoDB queries and indexing
- Implemented CI/CD and monitoring (Prometheus, Grafana)

SKILLS

Backend: Python, Node.js, FastAPI, Express, Microservices Architecture

Event Systems: Apache Kafka (Pub/Sub), SQS, Event-Driven Architecture

Databases: PostgreSQL, Redis, DynamoDB

Generative AI: RAG, LangChain, Vector Search, AI Agents (MCP), LLM APIs

APIs & Frontend: REST, GraphQL, gRPC, Webhooks, React

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD

EDUCATION

AKTU : B.Tech, Computer Science and Engineering | **8.2 CGPA**

CERTIFICATIONS

- Machine Learning (IIT Kanpur Workshop)
- DBMS — (NPTEL)
- System Design Cohort
- Generative AI (Udemy)
